

Blood Test Report

Name: Olivia Davis

Age: 40

Gender: Female

Date: 2023-10-07

Patient ID: OD-0709

Findings:

The blood test results indicate that the glucose levels, hemoglobin, and lipid profile are within normal ranges. However, elevated levels of C-reactive protein were noted.

Diagnosis:

The elevated levels of C-reactive protein may indicate an ongoing inflammation or infection. The patient is advised to undergo further tests and possibly start a course of antibiotics.
