

CT Scan Report

Name: Sofia Martinez

Age: 28

Gender: Female

Date: 2023-10-05

Patient ID: SM-0901

Findings:

The CT images of the chest show clear lung fields and bronchial passages. However, there is a minimal pleural effusion seen in the left lung.

Diagnosis:

The pleural effusion is small and may be due to a recent infection or inflammation. Recommendation is to do a follow-up scan after a course of antibiotics and anti-inflammatory medication.
