

Bone Density Test Report

Name: Olivia Davis

Age: 40

Gender: Female

Date: 2023-10-07

Patient ID: OD-0709

Findings:

The bone density test revealed lower-than-normal bone mineral density in the lumbar spine and hip region. The T-score was -2.5 in both regions.

Diagnosis:

The T-score of -2.5 indicates osteoporosis. The patient is advised to start medication to improve bone density and consult an endocrinologist for further management.
