

Ultrasound Report

Name: Michael Brown

Age: 54

Gender: Male

Date: 2023-10-06

Patient ID: MB-0807

Findings:

The ultrasound images show a liver with normal echotexture and no focal lesions. However, the gallbladder shows polypoid lesions measuring less than 1 cm.

Diagnosis:

The polypoid lesions in the gallbladder are likely benign, but monitoring is suggested. A follow-up ultrasound after 6 months is recommended.
