

Colonoscopy Report

Name: Emily Thompson

Age: 32

Gender: Female

Date: 2023-10-03

Patient ID: ET-1203

Findings:

The colonoscopy showed a generally healthy colon and rectum but revealed one polyp in the sigmoid colon. The polyp was removed for biopsy.

Diagnosis:

The presence of a polyp suggests a risk for colorectal cancer. The removed polyp has been sent for biopsy to determine if it is benign or malignant. A follow-up consultation is advised.
