

Urine Test Report

Name: Sofia Martinez

Age: 28

Gender: Female

Date: 2023-10-05

Patient ID: SM-0901

Findings:

The urine test shows normal levels of proteins, glucose, and ketones. However, microscopic examination revealed the presence of red blood cells.

Diagnosis:

The presence of red blood cells in the urine sample suggests a possible urinary tract infection or kidney issue. Further diagnostic tests, including a kidney ultrasound, are recommended.
