

X-Ray Report

Name: Emily Thompson

Age: 32

Gender: Female

Date: 2023-10-03

Patient ID: ET-1203

Findings:

The X-Ray images of the lower limb show intact bones without any visible fractures. However, some calcification is observed near the knee joint.

Diagnosis:

The calcification near the knee joint suggests early signs of arthritic changes. The patient is advised to consult an orthopedic surgeon for further evaluation and treatment options.
